

<b>Name</b>	John Watson	
<b>Position</b>	Production Director	
<b>Date of Birth</b>	1960	
<b>Qualifications</b>	Post Graduate Diploma in Strategic Management Diploma in Management A3 - Quality Management A2 - Standards Specifications and Audits A1- Introduction To Quality	

### Roles and Responsibilities:

Reporting to the Managing Director, John's main responsibilities include:

- Overseeing direct activities i.e. fabrication, machining, assembly and indirect functions such as production control, factory services, quality control and maintenance;
- Eliminating waste and implementing cost control systems;
- Implementing and managing continuous improvement initiatives;
- FTEE – employee effectiveness;
- Costs of quality/non conformance;
- Variations to original scope of supply;
- Overtime levels and justification;
- Direct and indirect operating costs;
- Accident statistics;
- Time and attendance.

### Work Experience:

John has been with DavyMarkham for over 20 years. Having joined the company in 1988 as a Lathe Turner, John was transferred to the shop floor after three years, where he quickly progressed and became a Major Projects Quality Engineer. After being promoted to several roles within the company including; Production Department Shift Manager, Company Quality Manager and Production Manager, John took his newest role of Production Director in January 2008.

In this role John reports directly to the board and works with them to achieve DavyMarkham's strategic objectives in relation to on-time delivery, contract performance, sales development and profitable trading. He also identifies and implements appropriate training plans for the shop floor staff to help foster a culture of employee collaboration.
